Safety Data Sheet

B790 SkidTM Penetrating Lubricant

Copying and/or downloading of this information for the purpose of properly utilizing Stoner Inc. product is allowed provided that: (1) the information is copied in full with no changes unless prior agreement is obtained from Stoner Inc., & (2) neither the copy nor the original is resold or otherwise distributed with intention of earning profit thereon.

1. IDENTIFICATION

Stoner Incorporated 1070 Robert Fulton Hwy. Quarryville, PA 17566

1-800-227-5538

Product Name: SkidTM Penetrating Lubricant

Product Code: B790
Product Use: Penetrant Lubricant

24-hour emergency phone: 1-800-424-9300 [CHEMTREC]

2. HAZARD IDENTIFICATION

POTENTIAL HEALTH EFFECTS

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

GHS Hazard Symbols

GHS Classification Germ Cell Mutagenicity Category 1B

Carcinogenicity Category 1A Aspiration Hazard Category 1 Skin Corrosion/Irritation Category 2

Serious Eye Damage/Eye Irritation Category 2A

Reproductive Toxicity Category 2

Specific Target Organ Systemic Toxicity (STOT) - Repeated Exposure Category 2

Flammable Liquid Category 3

Hazardous to the aquatic environment - Acute Category 3 Hazardous to the aquatic environment - Chronic Category 3

Signal Word Danger

Hazard Statements Flammable liquid and vapour.

May be fatal if swallowed and enters airways.

Causes skin irritation.
Causes serious eye irritation.
May cause genetic defects..
May cause cancer.

Suspected of damaging fertility or the unborn child.

May cause damage to organs through prolonged or repeated exposure.

Harmful to aquatic life.

Harmful to aquatic life with long lasting effects.

Precautionary Statements

Prevention Obtain special instructions before use.

Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. – No smoking.

Keep container tightly closed.

Ground/bond container and receiving equipment.

Use explosion-proof electrical/ventilating/lighting/.../ equipment.

Use only non-sparking tools.

Take precautionary measures against static discharge. Do not breathe dust/fume/gas/mist/vapours/spray.

Wash thoroughly after handling. Avoid release to the environment.

Wear protective gloves/protective clothing/eye protection/face protection.

Use personal protective equipment as required.

Response IF SWALLOWED: Immediately call a POISON CENTER/doctor/....

IF ON SKIN: Wash with plenty of soap and water.

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.

Continue rinsing.

IF exposed or concerned: Get medical advice/attention.

Get medical advice/attention if you feel unwell.

Specific treatment (see \dots on this label).

Do NOT induce vomiting.

If skin irritation occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash before reuse.

In case of fire: Use ... to extinguish.

Storage Keep container tightly closed.

Store in a well-ventilated place. Keep cool.

Store locked up.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulation for hazardous wastes.

3. COMPOSITION/INFORMATION ON INGREDIENTS

| COMPONENT | CAS# | Percent Percent |
|---|------------|-----------------|
| Xylene | 1330-20-7 | 20 - 40 |
| Solvent naphtha (petroleum), heavy aliph. | 64742-96-7 | 1-20 |
| Distillates (petroleum), hydrotreated light | 64742-47-8 | 1-20 |
| Stoddard solvent | Mixture | 1-20 |
| Ethyl benzene | 100-41-4 | 1-20 |
| Petroleum hydrocarbon | 64742-47-8 | 1-20 |
| Organic oil | 8002-09-3 | 1-20 |
| Trimethylbenzene 1,2,4- | 95-63-6 | 1-20 |
| Naphthalene | 91-20-3 | 1-20 |
| Trimethybenzene | 25551-13-7 | 1-20 |
| Benzene | 71-43-2 | 0.1- 0.99 |
| Cumene | 98-82-8 | 0.1- 0.99 |

HMIS® III* HAZARDOUS WARNINGS:

Health: 2* Flammability: 3 Physical: 1 Personal See Section 8 Protective

Equipment:

4. FIRST AID MEASURES

Eyes: Immediately flush eyes gently with plenty of water for at least 15 minutes while holding eyelids apart. If symptoms persist or there

is visual difficulty, seek medical attention.

Skin Contact: In case of contact, immediately wash contaminated area with plenty of water for at least 15 minutes. Seek medical attention if

symptoms persist. Wash clothing before reuse.

Ingestion: If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs. Do not induce vomiting. Have

victim drink 8 to 10 ounces of water to dilute the material in the stomach. Contact a physician, medical facility, or poison control

center immediately. Aspiration into the lungs can cause serious damage.

Inhalation: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Keep the victim warm and

quiet. Seek immediate medical attention.

NOTES TO PHYSICIAN:

Inhalation of high concentrations of the material, or one of it's components, as could occur in enclosed spaces or during deliberate abuse, may be associated with cardiac arrhythmias. Sympathomimetic drugs may initiate cardiac arrhythmias in persons exposed to this material. This material is an aspiration hazard. Potential danger from aspiration must be weighed against possible oral toxicity when deciding whether to induce vomiting. This material is an aspiration hazard. This material is an aspiration hazard. Potential danger from aspiration must be weighed against possible oral toxicity when deciding whether to induce vomiting. Preexisting disorders of the following organs (or organ systems) may be aggravated by exposure to this material: Treatment is symptomatic and supportive. Preexisting disorders of the following organs (or organ systems) may be aggravated by exposure to this material: skin; lung (for example, asthma-like conditions); kidney; auditory system; arrhythmias (irregular heartbeats); liver; blood forming system; respiratory tract

5. FIRE FIGHTING MEASURES

Fire and/or Explosion Hazards: This product contains a component(s) that is considered a flammable liquid, which has vapors that are heavier

than air and may travel along the ground or be moved by ventilation and ignited by heat, pilot lights, or other flames and ignition sources at locations distant from the material's handling point. In extreme fire conditions this

material may present a floating fire hazard.

Fire Fighting Instructions:

Use CO2, foam or dry chemical. Fire fighters should wear normal protective equipment and positive-pressure self-contained breathing apparatus. Water is generally not effective and may spread fire; however, water spray may be used from a safe distance to cool closed containers and protect surrounding area. Do not direct a solid stream of

water or foam into hot burning pools, this may cause frothing and increase fire intensity.

Stoner Incorporated B790 PAGE 2

^{*} See www.paint.org/hmis or call the NPCA at 1 (202) 462-6272 for more information on this current rating system.

ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Wear appropriate personal protective equipment (PPE). Stop or reduce discharge if it can be done safely. Avoid run-off into storm sewers and ditches which may lead to natural waterways. Clean up with absorbent material. Place absorbent materials into container and close it tightly. Dispose of container properly. Remove all sources of ignition. Ventilate contaminated area. If runoff occurs, notify authorities as required. Wear appropriate clothing.

7. HANDLING AND STORAGE

Storage:

Handling: Do not use near ignition sources. Avoid prolonged or repeated breathing of vapor. Avoid prolonged or repeated contact with skin. Use

with adequate ventilation. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition; they may explode and cause injury or death. Avoid contact with eyes. Wash hands thoroughly after handling. Normal precautions common to safe manufacturing practice should be followed in handling and storage. Use bonding and grounding when transferring quantities of material. Wear proper protective equipment. This material, being heavier than air, tends to

accumulate near the floor of an enclosed space displacing the air upward and creates and oxygen-deficient atmosphere.

Keep container tightly closed when not in use. Store in a cool, dry, well ventilated area away from all sources of ignition. Keep away from heat, sparks and flame. Empty container may contain residues which are hazardous. Store away from incompatible materials such as

materials that support combustion (oxidizing materials) and corrosive materials (strong acids or bases).

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Ventilation should be adequate to prevent exposures above the limits indicated below in this section of the MSDS (from Engineering Controls:

known, suspected or apparent adverse effects). No exposure limits exist for the constituents of this product. Local exhaust

should be used in areas where exposure limits may be exceeded.

Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as Eye Protection:

chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid or

airborne material. Do not wear contact lenses. Have an eye wash station available.

The use of chemically resistant gloves is recommended if there is any possibility of prolonged or repeated liquid contact with Skin Protection:

If respiratory irritation develops below the recommended exposure limits, use an NIOSH approved nuisance Respiratory Protection:

dust/mist/organic vapor respirator. A supplied air respirator should be used if ventilation is not sufficient to maintain exposure limits. Use NIOSH approved respirator where there is likelihood of inhalation of the product mist, spray or aerosol. Where concentrations are above recommended limits as determined by air sampling or are unknown, appropriate respiratory

protection should be worn. Follow OSHA respirator regulations and use NIOSH/MSHA approved respirators.

10. STABILITY AND REACTION

Chemical Stability:

Conditions to Avoid: Ignition sources such as open flames, sparks, static discharges or glowing metal surfaces. Avoid contact with: Strong

oxidizing agents. Chlorine. Hypochlorites. Strong bases. Strong acids. Open flames and high temperatures. Alkaline

earth metals.

Decomposition Products: Burning can produce the following combustion products: Carbon dioxide and carbon monoxide. Aldehydes. Various

hydrocarbons. Alcohols. Ethers. Ketones. Polymer fragments. Carbon Monoxide.
